"Nobody Needs to Die" – Frontline Doctors Storm D.C. Claiming "Thousands of Doctors" are Being Silenced on Facts and Treatments for COVID

by Frontline Doctors

Excerpt:

> America's Frontline Doctors stormed into Washington D.C. today to host their first annual White Coat Summit on Capitol Hill to combat the misinformation and propaganda on COVID being fed to the American people through the corporate media, while successful treatments against COVID are being censored by Big Tech.
>
> They held a brief press conference first that was sparsely attended, and where impassioned doctors, all of whom deal directly with COVID patients, claimed that the American people were being deceived, and that "nobody needs to die" from COVID, because all them are successfully treating COVID patients with effective cures that are being censored for political reasons.
>
> One of the speakers at the press conference today was Dr. Emmanuel from Houston, Texas. She stated that she studied medicine in Nigeria where she used Hydroxychloroquine for malaria patients, and is therefore very experienced with this medication, and that she has now treated over 350 COVID patients in Texas with Hydroxychloroquine, and none of them have died.
>
> "I'm here because I have personally treated over 350 patients with COVID. Patients that have diabetes, patients that have high blood pressure, patients that have asthma, all people.
>
> My oldest patient is 92. The result has been the same. I put them on Hydroxychloroquine, I put them on zinc, I put them on Zithromax, and they are all well.
>
> For the past few months I have taken care of over 350 patients with not one lost one. Not a diabetic, not somebody with high blood pressure, not somebody with asthma, not an old person.
>
> We've not lost one patient!
>
> And, on top of that, I've put myself, my staff, and many doctors that I know, on Hydroxychloroquine, for prevention.
>
> None of us have gotten sick.
>
> I came here to Washington D.C. to tell America, nobody needs to die!
>
> I'm upset! Why am I upset? Because I see people who cannot breathe. I see parents walk in, I see diabetics sitting in my office, knowing (thinking) that this is a death sentence! And they can't breathe!
>
> And I help them, and I tell them it's going to be OK. You're going to live. And we treat them, and they live.
>
> None have died!"
>
> When are you going to wake up, America, and realize that you are fearing the wrong thing! You do not need to fear COVID, you need to fear our political medical leaders who are complicit with MURDER!!

Frontline Doctor Stella: "I should let people die because I'm scared of Anthony Fauci? I should let people die because I'm scared of the WHO? I'm not scared of any of them. I'm not going to let people die."

by Dr. Stella Immanuel

Excerpt:

> Dr. Stella Immanuel, one of the Frontline Doctors that appeared in Washington D.C. last week where their press conference, and Dr. Immanuel's testimony that "Nobody needs to die from COVID" with her example of treating 350 patients with COVID and ZERO fatalities, went viral with over 20 million views, before Big Tech censored the doctors and scrubbed all of their videos from the Internet, was interviewed in her home city, Houston, on Saturday by Clicked2Houston.com.
>
> You can watch the final edited version where local Houston media obviously felt compelled to give Dr. Anthony Fauci and the WHO's opinion on that matter.
>
> But Clicked2Houston.com has done everyone a favor by also publishing the entire interview with no edits as well.
>
> In line with the "Fair Use" doctrine and given how quickly these videos disappear, Health Impact News has also grabbed a copy and published it on our Bitchute channel.
>
> It is clear from the reporter's questions and comments that he is trying to trap Dr. Immanuel, but she quickly and forcefully responded to every question and criticism that was put to her, and put the tyrannical medical authorities and the complicit corporate media on the defense instead.
>
> "Ask Dr. Anthony Fauci, when was the last time he saw a patient? When is the last time he put a stethoscope on a patient? And I'm willing to ask him that.
>
> I'm still waiting for him to come and give me a pee sample to find out if whether he's on hydroxychloroquine to treat himself.
>
> Let TMB (Texas Medical Board) come after me. I should let people die because I'm scared of TMB? Or I should let people die because I'm scared of Anthony Fauci? I should let people die because I'm scared of the WHO?
>
> I'm not scared of any of them. I'm not going to let people die! And if they come after me, it's going to be on! I'm not going to let people die."

Editors of The Lancet and the New England Journal of Medicine: Pharmaceutical Companies are so Financially Powerful They Pressure us to Accept Papers

by Vera Sharav

Excerpt:

> Philippe Douste-Blazy, MD, is a cardiologist and former French Health Minister who served as Under-Secretary General of the United Nations. He was a candidate in 2017 for Director of the World Health Organization.
>
> In a videotaped interview on May 24, 2020, Dr. Douste-Blazy provided insight into how a series of negative hydroxychloroquine studies got published in prestigious medical journals.
>
> He revealed that at a recent Chatham House top secret, closed door meeting attended by experts only, the editors of both, The Lancet and the New England Journal of Medicine expressed their exasperation citing the pressures put on them by pharmaceutical companies.
>
> He states that each of the editors used the word "criminal" to describe the erosion of science.
>
> He quotes Dr. Richard Horton who bemoaned the current state of science:
>
> "If this continues, we are not going to be able to publish any more clinical research data because pharmaceutical companies are so financially powerful; they are able to pressure us to accept papers that are apparently methodologically perfect, but their conclusion is what pharmaceutical companies want."

Was a False Hydroxychloroquine Narrative Created to Destroy the Competition for Gilead's Remdesivir?

by Vera Sharav

Excerpt:

> Below, Dr. Meryl Nass reviews long a list of corrupt practices. The practices undermine the integrity of medical practice during the current medical crisis; a crisis significantly made worse by stakeholders who are focused on projected future profits from not-yet-developed "countermeasures" against COVID-19.
>
> The stakeholders include public health officials, global public health institutions, government advisory committees, clinical trialists who design trials to provide commercially beneficial results, and editors of prestigious high impact, medical journals.
>
> These collaborators engaged in an orchestrated effort to prevent physicians from utilizing an existing, off-patent, cheap and affordable drug, that thousands of clinicians attest to its therapeutic benefit.
>
> The problem with Hydroxychloroquine is that there is no profit to be made from this off-patent drug!
>
> It is remarkable that a series of events taking place over the past 3 months produced a unified message about hydroxychloroquine, and produced similar policies about the drug in the US, Canada, Australia, NZ and western Europe. The message is that generic, inexpensive hydroxychloroquine is dangerous and should not be used to treat a potentially fatal disease, Covid-19, for which there are no (other) reliable treatments.
>
> Hydroxychloroquine had been used safely for 65 years in millions of patients. And so the message was crafted that the drug is safe for its other uses, but dangerous when used for Covid-19. It doesn't make sense, but it seems to have worked.
>
> Were these acts carefully orchestrated? You decide.

Is the 100% Cure Rate of Hydroxychloroquine a Threat to Fast-Tracking the COVID Vaccines?

by Del Bigtree

Excerpt:

> Medical journalist Del Bigtree of the weekly broadcast Highwire discussed on his show this week what he believes may be the primary reason why Fauci and the other political medical tyrants are so desperately trying to censor the positive results of Hydroxychloroquine (HCQ), a drug that has been around for over 65 years and is already FDA approved.
>
> The reason is probably because they want to force a COVID vaccine upon the public, and to do so, they need to fast-track the development of these vaccines, and then the FDA has to issue a an Emergency Use Authorization (EUA) to approve it.
>
> According to the "Qualifying Criteria" that allows the FDA to issue an EUA, there must be "No adequate, approved, and available alternative."
>
> HCQ is an "adequate, approved, and available" alternative, which should then disqualify any EUAs issued for a vaccine to treat COVID.
>
> The problem, of course, is that the Trump Administration has already given over $8 BILLION to Big Pharma to develop the vaccine in "Project Warp Speed," fast-tracking the vaccines development.
>
> In fact, this has already happened with Gilead's anti-viral drug Remdesivir, which was fast-tracked as a treatment for COVID and then issued an EUA.
>
> While the cost for the older HCQ medication is only about $20, Remdesivir's cost is about $3200.00.
>
> These mass murderers who call themselves "doctors" and claim absolute authority on medical issues do not treat patients themselves, but they control the FDA, the CDC, the NIH, and pretty much the entire Government.
>
> They don't value human life, and only want control so they can usher in their New World Order, and if a fast-tracked COVID vaccine ends up injuring and killing more people than COVID, it fits in perfectly with their plans for their New World Order and a One World Government as they seek to reduce the world's population of those they deem "non-essential."

More Doctors Speak Out on Censorship and Mass Murderer Anthony Fauci's False Information Regarding Hydroxychloroquine

by Brian Shilhavy

Excerpt:

> As mass murder Dr. Anthony Fauci continues to appear in the corporate media to attack the use of hydroxychloroquine (HCQ), which thousands of doctors have now said can completely cure COVID, more doctors are coming forward to expose his lies.
>
> Fauci publicly attacked a recent positive study about HCQ published by the Henry Ford Health System, prompting two of the leading doctors of the study, doctors Adnan Munkarah and Steven Kalkanis, to publish an "Open Letter" refuting the lies of the mass murderer, Anthony Fauci.
>
> Dr. Munkarah works as the chief clinical officer of the Henry Ford Health System, and Dr. Kalkanis works as the chief academic officer.
>
> Fauci's main complaint about their study is that it was not a "double-blind, randomized clinical trial," which is considered the "Gold Standard."
>
> This is an interesting criticism, since almost all of the current new medical products being fast-tracked by the FDA to treat COVID, are also not "double-blind, randomized clinical trials."
>
> This is especially true for the COVID vaccine drug trials, which do not even use a true placebo, but instead usually use another vaccine known for serious side effects, to make the new COVID vaccine appear to be more safe.
>
> Another doctor who has spoken out in an article published today (August 4, 2020) is French Dr. Pascal Sacré. The title of his article is:
>
> COVID-19: We have a Treatment: Hydroxychloroquine (HCQ). We do Not Need a Vaccine!
>
> Texas doctors Dr. Kevin R. Wheelan, chief of cardiology at Baylor Heart and Vascular Hospital in Dallas and Dr. Peter McCullough, a clinical cardiologist and professor at the Texas A&M School of Medicine, have also made public comments and sent a letter to the FDA a few days ago.
>
> This is just a sampling of the doctors who are coming forward and speaking out, but don't expect the national corporate media to give them any coverage, and don't expect to find out anything about these doctors if you do a Google Search, as Google and the rest of Big Tech are accomplices to mass murder along with the big corporate media outlets, such as CNN, NBC, ABC, MSNBC, and also Fox News.
>
> Because English is now the common language among the educated around the world, hundreds of thousands of readers from India and Africa have also been coming to Health Impact News to learn the truth about HCQ during the past few days.
>
> The question now is will Americans wake up in time to free themselves of this medical tyranny, or just mostly continue to willingly comply with their own destruction?

SCANDAL! Anthony Fauci has been Mass Murdering People for Decades! Prevented AIDS Patients from Receiving Life-saving Cheaper Drug

by Brian Shilhavy

Excerpt:

> Putting his own life and career on the line, Yale epidemiologist Dr. Harvey Risch continues to make public media appearances exposing the hydroxychloroquine scandal, which he admits is responsible for the deaths of hundreds of thousands of Americans, and millions worldwide.
>
> Appearing on Fox News last night (Sunday, August 23, 2020) on the Mark Levin show, Dr. Risch explained how the FDA is also complicit with these mass murders, and that this is not the first time Anthony Fauci has withheld cheap, older and effective drugs from patients whose lives could have been saved, in exchange for waiting for a new drug instead that could be patented and marketed for great profit.
>
> Dr. Risch explained that what Anthony Fauci has done recently by spearheading the move to ban HCQ which has now been used effectively by thousands of doctors worldwide to successfully treat COVID patients, many with 100% cure rates, he also did it in the 1980s with AIDS patients.
>
> Dr. Risch said:
>
> "The FDA … has a history of not making science-based, rational-based, decisions about its approvals.
>
> This was started most noticeably in 1987, when people with AIDS in New York City were dying of what is called pneumocystis pneumonia, PCP.
>
> The clinical experience then had been amassed of a large number of cases who were prevented from dying by use of the antibiotic bactrim.
>
> This is (another case where) even then there was a generic medication and cheap."
>
> They petitioned the FDA and Dr. Fauci at the NIH to approve the drug for AIDS patients.
>
> But Anthony Fauci refused, preferring to manufacture a new patented drug instead (AZT) and as a result over a 2-year period 17,000 AIDS patients died in the U.S., needlessly.
>
> Anthony Fauci is a mass-murderer who has never been brought to justice.
>
> It is time for citizen arrests, citizen grand juries, citizen-led trials, and citizen-led convictions, as provided by the Constitution of the United States.
